OBJECTIVE

Fullstack Web Developer

PROFESSIONAL SUMMARY

Experienced web developer with expertise in HTML5, CSS3, and JavaScript, utilizing Express or NestJS depending on the requirements, and TypeScript for more secure and scalable code. Solid experience in building reactive applications with React, integrating them with MySQL/NoSQL databases. Proficient in AWS, ensuring reliable and scalable infrastructure for web projects.

EDUCATION

Bachelor's Degree in Systems Analysis and Development (Estácio de Sá) -

Expected Completion: 2025

PROFESSIONAL EXPERIENCE

FST TECNOLOGIA (Medium-sized company)

Fullstack Developer

Oct/2023 - Present

- Developed web applications with HTML, CSS, and JavaScript using TypeScript for secure and scalable code.
- Created dynamic and responsive interfaces using React to provide exceptional user experience.
- Built robust servers with Node.js employing Express or NestJS to create efficient and scalable APIs.
- Integrated SQL and NoSQL databases for efficient data storage and retrieval, continuously improving database development practices.
- Actively collaborated on deploying and managing cloud infrastructure on AWS, including S3, ensuring service scalability and reliability.

ÁGUAS DO PARAÍBA S.A (Large company)

Web Developer Apprentice

Oct/2022 - Aug/2023

- Developed and maintained responsive websites using HTML5, CSS, and JavaScript.
- Used Sass and Bootstrap to speed up development and facilitate maintenance.
- Collaborated in multidisciplinary teams to translate design requirements into functional code.
- Implemented SEO and accessibility practices to enhance user experience.
- Ensured consistency and quality throughout project lifecycles.

- NodeJS The Complete Guide (Udemy) – 41h
- NLW Expert Node.js Path (Rocketseat) – 5h

PROJECTS

Tecma Educação

Online courses e-commerce built with React.JS.

- SEO optimization for better visibility in search engines.
- Frontend development with ReactJS.
- API integration using Axios.
- Cookie management with js-cookie.
- Global state management with Zustand.
- Efficient data queries with React Query.
- Modern responsive design with Tailwind CSS.
- [Demo](#)

Tiro Certo – Frontend

Web system for managing amateur shooting athletes.

- Test with CPF: 000000000000.
- Contact for admin access.
- Developed with React and TypeScript integrating Axios.
- Used Tailwind for modern, responsive design.
- State management with Zustand.
- Efficient data queries with React Query.
- Data import/export with Excel (xlsx).
- Notifications with React Toast.
- Form validation with React Hook Form.
- [Demo](#) | [Source Code](#)

Tiro Certo – Backend

Backend for secure and performant data management.

- API development with Node.js, TypeScript, and Express.
- Middleware use: Body Parser, Cors.
- Firebase integration for photo storage.
- Security with JWT and BcryptJS.
- UUID generation for unique resource identification.
- File handling with Multer.
- MongoDB connection using Mongoose.
- [Demo](#) | [Source Code](#)

Weather App

App for weather monitoring of specific locations.

- Interface development with HTML5 and CSS3.
- Dynamic functionalities with JavaScript.
- Weather API integration using Axios.
- [Demo](#) | [Source Code](#)

ADDITIONAL INFORMATION

- Full mobility.
- Driver's licenses: Category A, Category B.
